ones on the flowers
top have a white
Margin If Cut
or Slice a Quantity
of Milk Runs Juice
some of the plants
was three feet high

360 Found
a large bush in
small tree with
shining green leaves
and with bunches of
black fruit 2 inches
long at base had
five white Colored
petals found in
woods and hedge
rows 15 to 20 feet
high

3/61 Stem of Cultivated tree fruit 29 feet high 10 inches in diameter unarmed branches of fruit

362 Small

Feathery plants found in moist stony banks by a stream difficult to dry

363 This plant found growing many specimens forming large patches lying as if blown in a moist thick spot end of the garden 15 inches to two feet high

364 Mold

found on a wall that was moist made of a plaster not much in Condition for specimen -

365 A showy
ornamental plant
found in shady
woods near a
spring worthy of
cultivation found
4 to 6 feet high flowers
upper part Scarlet
lower Cream Color

364 Prostrate
plant common on
the streets of the
village its golden
yellow flowers peer-
ing up amid the
many weeds many
of which much
+ troublesome
are killed
off by domestic
animals

367 A fine specimen of Ceanothus Velutinus in the woods at Feathery Lake. Note other plants about 4½ to 5 feet high. Mesa in background. Suitable for ornamental for Cultivation.

368 The tree
with a very large
top that of the
umbrella tree many
could live under
it situated in
a garden that
is 40 feet in dia-
meter and 50 ft
in high it has
crop of small fruit
that mostly fall
to the earth.

369 Lobelia

small prostrate plant among small plants on a moist slope to a spring flowered pale blue white middle.

370 One plant
in shady woods
near spring, rather
moist banks -
fern fronds
branches about
five feet high with
immature fruit

371 In every thorny
plant which bears
clusters of three
flowers or more
on the stalk there
is a great crop of white
honey-sweet scented flowers,
in great racemes bent
almost the flowers that
are coming into bloom
finely

372 These plants
taken from plants
growing in wood
near Spring their
peculiar weak stem
hang for support
on low plants.
not in very good
condition flowers
white

373 Frame
found in the
water near a
spring not far away
from it. Not in
good condition

374 Ferns
but few flowering
plants, no woods
near to afford
domestic animals
had imported
them readily

3 25 Three

found one wood
near a spring
domestic animals
had eaten nearly
all the plants

Powers Bldg.
Room

402 Zapote

The Zapote tree
with much the form
of the apple tree
but not quite so
large. The flowers
are small white and
have a rank smell
The fruit, which
is yellow and like
the Cerimelle
must be eaten out of
the hand. It has
a white pulpy
Covered with a leaf.

408 A fine erect
fodder strawberry
plant much after
the form of the large
hay stalk bears
almost 5 feet high
Stalk green leaves
fruit black when
ripe the ends seem
tufted with age

405

407 Chart of
Marble Limestone
as seen in State
Quarries at Tate Georgia
Here many steps
made from blocks 5
to 10 feet high
and as great per-
fection of surface
as were desired planed

414 Plant

Plant found on hill side near spring Classified under plants and on the ground flowers after by day in June with

Lily A plant found
in Switzerland and
in woods with lea-
thery leaves and a
profusion of white
sweet scented flowers
Used to dye Red
Over the plant.

421 Woods

About about
4 feet high with
four white flowers
and coral red
berried light green
leaved edge of a
strip of woods

One plant
in a meadow
of barnes grass
quite long stem
less with two
large flowers of
magenta and
maroon like
white Hollyhocks
a long bulbous root

494 Coccoloba Tenuifolia
Wild Tamarind
A Cultivated tree found in Cultivation about dwellings for its edible fruits which are used for preserves. Flowers in the Autumn. They are a Coffee Colour but inside I have green yellowish. I have much denser and is diameter of 1 to 3 feet or so

444

Ants breathe
Ants live in the house
Ants feed on the
plant and eat the
flower with few
stems flowers yellow
but dry. Pairich, few
leaves.

449 A shrubby plant with several stems 6 to 10 feet long, many of which bear at their ends a cluster of showy white flowers.

450 A bush
growing woody
plant in a fence
row in front
5 to 6 feet high
with stiff laterals

5-31 Fayetteville

Pine Uncommon tree with pea green leaves 5 inches wide. Limbs had mostly been cut off near tree tops. Trees 30 to 36 feet high diameter 2 to 3 feet. Green litter pad not over 2 feet. Other features worthy of mention

5-24 small roadside
plant hill sided edge
of woods three very
yellow flowers.

5-35

pleasant / pine trail
Nice, flowers yellow
hill side near
wood

536

Throughout Kentucky plant life, here and there, still hides near woods flowers showy yellow.

5-30 A very showy
bog plant with several
stems 5-10 feet high
an umbel of white to
lavender flowers a
mixture of yellow
and dark colors,
toothed and leaves
deep.

5 ft 7 a plant with a few weak stems about 4 to 5 feet high having few other branches

541 A small tree
like form with
shiny green leaves
about 5 to 10 feet
high with [illegible]
fruits very green by
ripe becomes yellow

6-4-1

A tree becoming scarce because of the usefulness of the wood & the fruit. Crop of fruits are eaten by human and animals are told in the market. grows upto 20 ft. high and from three feet to the four thousand feet above sea level.

5-3-0

Rather the more
plant but little pay
in power it might
do because much re-
sembles that for the
Power Fall 5 to 10 feet
high

Prospect

5-51 Arabis Drummondii

The basal rosette leaves are white
hairy & obovate-oblong & entire
or toothed. The other leaves are
sessile & clasping the stem. The
branches at the summit bear
flowers white and sweet
scented. Stems 1 or more
about 1 foot high. Pods
linear-lanceolate three or
four centimeters long with
two deep furrows. Plants 10 feet high
Very desirable annuals
willingly to grow

552 Gardens.

One acre garden for
working boys to
work in plot fenced with
fenced and hedges
as it may be good trees
fruit trees to be set
east end of the one acre
Corner about 15 feet by
15 feet and to grow two
feet in diameter.

April 27 to 30

182 A very thorny
dwarf tree or shrub
large bushy small
tree, largely found
in fence rows 15 feet
to 25 ft high to 3 and 4 in
their diameter. Have
many leaves but be
comes deciduous & bears
white flowers.

183 Home Plants

Hanging Moss

This specimen was obtained from Orange and other Islands in the Bahamas but the many novel and wild uses near had not been thought of. This plant and told it some what used by upholsters

104 Large thuja with trunk a bronze hue over it, not in good condition about 6 feet high in a garden hedge in front

185 One plant
seen in a garden
fence - 6 foot two
inches high with
a few straggly
branched and bear-
ded F small black
fruit on the ends

1916 One quite good dried plant much mildewed by domestic animals, light green leaves and white colored flower, rather pleasant odour 3½ feet high The poor condition in which plant, but poor flowers.

187 Plant not much
seen, It coming into
flower which is snow
white and scented finely
by the Heliotrope odor
a plant with numerous
slender long stems hang-
ing for support
over other plants
in hedges + fence
stems 4 feet 10 inches
long

185 Plant found on
hedgerows on waste pla-
ces near Mansfield near and
there a solitary plants
from three to 6 feet high
many lateral light
green leaved white
flowered but few were
open at being put in
water they opened freely
in the dark as long as
there was a small of
moisture in the
atmosphere.

Work

190 Locust

Small tree with
spreading irregular branches
and marked quite
a top. Cultivated
about dwellings
flowers Grey White
but few leaves
15 to 20 feet high
Flowers in the Summer
in the Northern
Portions the fruit
of the State of Missouri
Potosi that is Tropical

191 Small trailing
plant with several
weak stems found
in company of other
plants on dry fence
bottom, in woods
shaded, not much
seen, flowers yellow
with brown outside

1912 Protrude
plant in low land
among other plants
flowers now but few
pinks and white.

193 One plant in open lot with several long stems prostrate on the earth with a profusion of soft fuzzy leaves and a few flowers of a snow white with purple stripes in circle at base of flower

195 Two pl. cuts
from tracts on fine
soil in fine rich
grass & weed with
long roots (not very
flowered stems fine
leaves pl. dark white
upper light purple.

196 four plants
in a square yard
about two feet apart
with flowers white

197 R. rough

Herb, heart white
several long stem
with few lateral
upon which is pro-
duced bunches of
flowers of pure color
and covered with
red flowers light
brown to dark red
by the heat from
leaves.

198 The Limerosa

One of the largest trees to be found protected by the state for its shade and size. Thirty feet high and 5-6 to 60 centimeters in diameter. Fruit of a cream and green shade. Tufted dark foliage, eaten by various birds and animals

199 Wild Fig

Not a common tree, almost dwelling. For its shade and ornament forty feet high and 60 to 80 centimeters in diameter.

2 OD

One pleasure
from the sea, with
yellow flowers
on the Coast Rd

S 23 15

204 Water Lettuce

Common plant on the Rivers and water but is distributed in Mexico very difficult to dry.

207 This plant
found in a valley
but among other
plants, flowers
yellow and mauve
brown petals.

214 Quite common
in some rather
shady spots where
natural shrubbery
planted here and there
seemed to be a free
blossomer from its
first crop if seeds
were withheld. Comes
best from cuttings, 2 feet
to 4 high
flowered Purple
White Canadian Centaurea,

215 A very showy plant quite numerous in some rather moist sandy soil, 8 inches to 1 foot extreme height much nibbled by domestic animals flowers fine purple with white base worthy of cultivation.

216 Plant quite
numerous by a lagoon
where the soil is moist
uniformerly many
together coming into bloom
and having some
